Antonie van Leeuwenhoek **65:** 403–406, 1994.

CONTENTS Volume 65 1994

Volume 65 No. 1

Research articles

Occurrence of thermophilic actinomycetes in natural substrates in Nigeria 1
I.C. Unaogu, H.C. Gugnani, J. Lacey

Membrane topology of the methyl-accepting chemotaxis protein DcrA from *Desulfovibrio vulgaris* Hildenborough 7
H.M. Deckers, G. Voordouw

Investigations of mannan and glucan in the cell wall of *Candida boidinii* cultivated on methanol 13
T. Hristozova, L. Michailova, V. Dmitriev, A. Tsiomenko, Z. Roshkova, D. Tuneva

Population biology of *Hortaea werneckii* based on restriction patterns of mitochondrial DNA 21
A.W.A.M. de Cock

Characterization of *Arxula adeninivorans* strains from different habitats 29
G. Kunze, I. Kunze

Characterization of cell surface material removed by water and NaCl washing of *Paracoccus denitrificans* grown under conditions of divalent cation deficiency and sufficiency 35
S. Wee, J.M. Dowding, M.J. Nadakavukaren, B.J. Wilkinson

Conidiogenesis, nutritional physiology and taxonomy of Aureobasidium and Hormonema 41
G.S. de Hoog, N.A. Yurlova

Yeast communities of the cactus *Pilosocereus arrabidae* and associated insects in the Sandy Coastal Plains of Southeastern Brazil 55
C.A. Rosa, P.B. Morais, A.N. Hagler, L.C. Mendonça-Hagler, R.F. Monteiro

Crotonobetaine reductase from *Escherichia coli* – a new inducible enzyme of anaerobic metabolization of L(-)-carnitine 63
S. Roth, K. Jung, H. Jung, R.K. Hommel, H.-P. Kleber

Effect of physiological conditions on the autolysis of *Staphylococcus aureus* strains 71
P.J. Tobin, N. Mani, R.K. Jayaswal

Announcement 79

Volume 65 No. 2

Paper awarded the Kluyver Prize 1993

The molecular basis of the host specificity of the *Rhizobium* bacteria 81
H.P. Spaink

Research articles

Analysis of ribosomal DNA restriction patterns in the genus *Kluyveromyces* 99
P. Shen, S.-C. Jong, F.I. Molina

Medium-induced fragility of *Schwanniomyces* 107
B.F. Johnson, I. Curran, T. Walker

Intraspecific metabolic diversity among strains of *Burkholderia cepacia* isolated from decayed onions, soils, and the clinical environment 111
D.S. Yohalem, J.W. Lorbeer

Purification and some properties of glyceraldehyde 3-phosphate dehydrogenase from *Synechococcus sp.* 133
O. Sand, I.M. Petersen, J. Jørgen, L. Iversen

Pleoanamorphic life cycle of *Exophiala (Wangiella) dermatitidis* 143
G.S. de Hoog, K. Takeo, S. Yoshida, E. Göttlich, K. Nishimura, M. Miyaji

Electrophoretic analysis of the lipopolysaccharides of *Bacteroides* spp. 155
J.P. Maskell

Announcement 163

Volume 65 No. 3

Special issue: 2nd European Conference on Fungal Genetics

Guest Editors: C.A.M.J.J. van den Hondel and T. Goosen

Guest Editorial 165

From what we know to what we need: A new age for fungal molecular genetics 167
W.E. Timbericke

Nitrogen regulation in fungi 169
M.X. Caddick, D. Peters, A. Platt

Regulatory circuits of the *amdS* gene of *Aspergillus nidulans* 179
M.J. Hynes

In vitro transcription and binding analysis of promoter regulation by a host-specific signal in a phytopathogenic fungus 183
D. Straney, Y. Ruan, J. He

Control of mating and development in *Ustilago maydis* 191
T. Spellig, E. Regenfelder, M. Reichmann, F. Schauwecker, R. Bohlman, M. Urban, M. Bölker, J. Kämper, R. Kahmann

Population genetics of filamentous fungi 199
R.F. Hoekstra

Suppression of gene expression by homologous transgenes 205
C. Cogoni, N. Romano, G. Macino

Protein targeting and secretion in filamentous fungi 211
P.J. Punt, G. Veldhuisen, C.A.M.J.J. van den Hondel

Genetics and gibberellin production in *Gibberella fujikuroi* 217
E. Cerdá-Olmedo, R. Fernández-Martín, J. Ávalos

Expression of genes and processing of enzymes for the biosynthesis of penicillins and cephalosporins 227
J.F. Martín, S. Gutiérrez, F.J. Fernández, J. Velasco, F. Fierro, A.T. Marcos, K. Kosalkova

Strategies for improving heterologous protein production from filamentous fungi 245
D.B. Archer, D.J. Jeenes, D.A. Mackenzie

Molecular genetics of *Aspergillus* pathogenicity 251
D.W. Holden, C.M. Tang, J.M. Smith

Molecular communication between host plant and the fungal tomato pathogen *Cladosporium fulvum* 257
P.J.G.M. de Wit, M.H.A.J. Joosten, G. Honée, J.P. Wubben, G.F.J.M. van der Ackerveken, H.W.J. van den Broek

Location of pathogenicity genes on dispensable chromosomes in *Nectria haematococca* MPVI 263
H. VanEtten, D. Funnell-Baerg, C. Wasmann, K. McCluskey

Volume 65 No. 4

Special issue: Bacterial Energetics and Transport

Guest Editors: W.N. Konings, R.K. Poole and A.H. Stouthamer

Editorial 269

Research Articles

Bioenergetics: the evolution of molecular mechanisms and the development of bioenergetic concepts 271
V.P. Skulachev

Structure and evolution of cytochrome oxidase 285
M. Saraste

Oxygen reactions with bacterial oxidases and globins: binding, reduction and regulation 289
R.K. Poole

Protein structure, electron transfer and evolution of prokaryotic photosynthetic reaction centers 311
R.E. Blankenship

Photobiology of bacteria 331
K.J. Hellingwerf, W. Crielaard, W.D. Hoff, H.C.P. Matthijs, L.R. Mur, B.J. van Rotterdam

Dissection of discrete kinetic events in the binding of antibiotics and substrates to the galactose H^+ symport protein, GalP, of *Escherichia coli* 349
P.J.F. Henderson, G.E.M. Martin, T.P. McDonald, A. Steel, A.R. Walmsley

A functional chimeric membrane subunit of an ion-translocating ATPase 359
D. Dou, S. Dey, B.P. Rosen

Solute transport and energy transduction in bacteria 369
W.N. Konings, B. Poolman, H.W. van Veen

Bacterial sodium ion-coupled energetics 381
P. Dimroth
